

IPv4 and IPv6 Routing Workshop

- **Date:** 6th to 10th September 2018
- **Venue:** OPT Centre, Nouméa, New Caledonia

Workshop Goals

This five-day IPv4 and IPv6 Routing Workshop, teaches network operators about routing using IPv4 and IPv6, and how to deploy IPv6 on their network infrastructure.

Target Audience

Technical staff who involved in Internet technology standards, local and national network infrastructure deployment, and day to day network operations.

Pre-requisites

It is assumed that the workshop participants know how to use a router command line interface, do basic router configuration and have a working knowledge of an IGP (OSPF or IS-IS) and BGP fundamentals. Knowledge of the IPv6 protocol is helpful but not essential.

This workshop is not an introduction. The lab exercises use Cisco IOS configuration syntax.

Participants are required to bring their own laptops. These can be Windows/Linux/macOS and must have working wireless to allow participation in the hands on lab exercises.

Class Size

The workshop can accommodate up to 30 participants
